REASONS FOR ALLOWANCE

1. Claims 1-25 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The prior art of records fails to disclose or render an obviousness of a digital signal processing apparatus for converting a digital signal into a second digital signal with one bit as a quantization bit comprising: a frequency analyzing, a first and second noise level calculating for calculating an average noise level on the basis of a result of the frequency analysis and on the dither signal respectively, a dither generating for generating a dither signal which is a signal of high frequencies beyond an audible range, a normalizing for normalizing the noise level above, and a delta-sum modulating for converting to a final 1-bit digital signal as cited in independent claims 1, 11, and 21; and a spectrum generating in placed for a dither generating as cited in independent claims 12, 20, and 25.

The closest found prior art is Swanson (U.S. 6,255,975). Swanson discloses a circuit and methods for noise filtering in 1-bit audio applications and systems using the same comprising: a low-pass filter, a zero order hold, and a delta-sum modulator. However, Swanson fails to disclose a in detail an apparatus comprising a frequency analysis, a first and second noise level calculation, a dither/spectrum generation, and a normalization as cited in above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chat C. Do whose telephone number is (571) 272-3721. The examiner can normally be reached on 7:00AM to 5:00PM M-Th.
